

# MD EBRAHIM ALI

## MERN STACK DEVELOPER

 Rajshahi, Bangladesh  +8801771-899062  web.ebrahimali@gmail.com  [Github](#)  [LinkedIn](#)  [Portfolio](#)

## PROFESSIONAL SUMMARY

Frontend-focused MERN Stack Developer with hands-on experience building scalable, production-ready web applications. Strong expertise in React-based UI development, state management, and responsive design, with solid backend experience in RESTful API development, authentication, and role-based systems. Passionate about performance, clean architecture, and user-centric experiences.

## WORK EXPERIENCE

### MERN Stack Developer — Project Experience

#### 2024– Present

- Developed multiple full-stack web applications using React, Node.js, Express, and MongoDB.
- Built secure authentication systems using Firebase Authentication and JWT.
- Implemented role-based dashboards for Admins, Managers, and Users.
- Integrated Stripe payments for subscriptions and event registrations.
- Designed RESTful APIs with proper authorization and secure data handling.
- Improved dashboard load performance using optimized queries and reducing unnecessary re-renders.
- Created responsive, mobile-first UIs using Tailwind CSS and DaisyUI.
- Worked with real-time data fetching using TanStack Query.

## SKILLS

- **Frontend:** HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), React
- **Backend:** Node.js, Express.js, REST API Design
- **Database:** MongoDB, Firebase
- **Authentication & Security:** Firebase Auth, JWT, Role-Based Access Control
- **State & Data Management:** TanStack Query (React Query), Axios
- **Payments & Integrations:** Stripe Payment Integration
- **Tools & Workflow:** Git, GitHub, Postman, Vite
- **UI/UX:** Responsive Design, Component Reusability, Clean UI Architecture

## EDUCATION

Kaligram Rathindranath Institution (2015 - 2020)

Secondary School

Shah Makhdum College, Rajshahi (2020-2022)  
College

University of Rajshahi, Rajshahi (2022 - present)  
Bachelor of Computer Science

## PROJECTS

### AssetVerse — HR & Asset Management System

Links: [GitHub](#) | [Live](#)

- Built a full-stack B2B web application for managing company assets and employees with HR and Employee role-based access.
- Implemented secure authentication and authorization using JWT, enabling protected routes and role-specific dashboards.
- Developed asset request, approval, and assignment workflows with real-time status updates.
- Integrated Stripe for package upgrades and subscription management.
- Added analytics dashboards using Recharts and server-side pagination for large datasets.
- Tech Stack: React, Tailwind CSS, DaisyUI, Node.js, Express, MongoDB, JWT, Stripe

### Cleanliness & Issue Reporting Portal

Links: [GitHub](#) | [Live](#)

- Designed and developed a web platform that allows users to report community cleanliness and public issues in real time.
- Implemented user authentication and role-based dashboards for admins and users.
- Built issue tracking features with status updates, image uploads, and location-based reporting.
- Created responsive, mobile-first UI with optimized performance and accessibility.
- Enabled real-time data updates and filtering for efficient issue management.
- Tech Stack: React, Firebase, Tailwind CSS, REST API
