PROFESSIONAL SUMMARY

Full Stack Developer with professional experience building production-scale web applications across e-commerce, SaaS, and enterprise platforms. Currently contributing to a large-scale CRM and e-commerce system at RemoteIntegrity using NestJS, Next.js, TypeScript, PostgreSQL, and AI integrations. Skilled in RESTful API design, database engineering, authentication systems, and high-performance frontend development. Delivered 8+ production-style projects spanning MERN, Next.js, Django, and modern DevOps practices.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL

Frontend: React.js, Next.js, Tailwind CSS, Framer Motion, HTML5, CSS3, Zustand, TanStack Query

Backend: Node.js, Express.js, NestJS, Django, REST API Design, Modular Architecture

Databases: MongoDB, PostgreSQL, Prisma ORM, Firebase Firestore, Redis

Auth & Security: JWT, Firebase Auth, Google OAuth, Role-Based Access Control (RBAC)

Payments & Integrations: Stripe, bKash, Nagad, Cloudfare, EmailJS, OCR, LLM Integrations

DevOps & Tools: Git, GitHub, Docker, VPS, CI/CD, Vercel, Render, Postman, Vite

PROFESSIONAL EXPERIENCE

Full Stack Engineer

Jun 2026 – Present

RemoteIntegrity • Clearwater, FL, USA — Remote • Full-time

- Designing and building scalable backend services using NestJS, TypeScript, and PostgreSQL with modular architecture and domain-driven design principles for a large-scale CRM and e-commerce platform
- Building RESTful APIs for authentication, customer management, product catalogues, order workflows, payment processing, inventory management, analytics, and admin operations
- Developing high-performance frontend applications using Next.js, React, and TypeScript with focus on SEO, maintainability, and user experience
- Working with PostgreSQL and Prisma ORM to design schemas, optimize queries, manage migrations, and maintain data integrity across complex business workflows
- Contributing to AI-powered solutions through OCR, intelligent document processing, automation workflows, and large language model (LLM) integrations

Full Stack Engineer

Dec 2025 – May 2026

Terabyte AI • Rajshahi, Bangladesh — Hybrid • Full-time

- Built full-stack web applications using MERN stack (MongoDB, Express.js, React, Node.js) with responsive, scalable user experiences
- Developed and maintained RESTful APIs, authentication systems, and authorization flows with optimized database operations for performance and reliability
- Worked with PostgreSQL, including schema design, complex queries, and data management workflows alongside MongoDB-based services
- Developed backend services and web applications using Python and Django with maintainable architecture and efficient API design
- Deployed and maintained applications on VPS environments; contributed to AI-powered products involving OCR, document scanning, automation, and LLM capabilities

Frontend Developer

Feb 2024 – Nov 2025

Zyplo • Bangladesh — Remote • Contract

- Developed responsive dashboard interfaces to improve usability and accessibility across devices for a collaborative workspace platform
- Implemented animated UI interactions using Framer Motion to create a smoother, more engaging product experience
- Built reusable frontend components and structured layouts supporting workspace, resource, and documentation management flows

Freelance Full Stack Developer

Feb 2025 – Dec 2025

Self-Employed • Bangladesh — Remote • Freelance

- Designed and shipped modern landing pages, dashboards, and interactive product experiences with strong UI execution, responsive layouts, and clean developer experience
- Delivered 8+ full-stack mini products with authentication, CRUD flows, third-party API integrations, and deployment on Vercel and Render

FEATURED PROJECTS

VELANO Fashion — Premium Ecommerce Platform

[Live Demo](#)

- **Production live site:** Full-stack ecommerce platform for a Bangladesh-based fashion brand with a customer storefront and integrated admin dashboard
- Architected separate Next.js frontend and Express/TypeScript backend with JWT auth, Google OAuth, and role-based admin access
- Built a rich product model supporting sizes, colors, media galleries, reviews, and related products for advanced merchandising
- Integrated localized payment flows for Bangladesh: bKash, Nagad, and cash-on-delivery with order tracking and payment verification
- Implemented membership and rewards system with spend-based qualification logic and async email notifications for order events

Tech: Next.js, React, TypeScript, Tailwind CSS, Express.js, MongoDB, Node.js, JWT, Zustand, Cloudinary, Google OAuth

Zyplo — Team Workspace & Resource Management Platform

[Live Demo](#)

- Collaborative workspace platform centralizing team workflows, structured documentation, and activity monitoring in one unified dashboard
- Designed workspace-based architecture with role-based access control, workspace creation/management/deletion, and dynamic routing
- Built analytics dashboards using Recharts to visualize workspace activity, resource usage, and team engagement metrics
- Implemented JWT-based authentication, reusable UI component system, and modular architecture for scalability and maintainability

Tech: React, Next.js, Tailwind CSS, Express.js, MongoDB, Node.js, JWT, Framer Motion, Recharts, Axios

AssetVerse — HR & Asset Management System

[Live Demo](#) | [Source Code](#)

- Full-stack HR platform for companies to manage employees, assets, requests, and role-based access across 3 user roles (Admin, HR Manager, Employee)
- Implemented JWT-backed APIs and role-based route protection for secure, scoped access by user type
- Integrated Stripe subscription system with package-based plans, checkout sessions, and payment verification
- Used TanStack Query for server-state management, responsive data refresh, and optimized dashboard load times

Tech: React, Tailwind CSS, Firebase, Express.js, MongoDB, Node.js, JWT, Stripe, TanStack Query, Recharts

ClubNest — Community Club & Event Platform

[Live Demo](#) | [Source Code](#)

- Community web app where users discover, join, create, and manage clubs and local events with searchable and browsable listings
- Designed modular event and club workflows with Firebase Auth for secure onboarding and role-aware membership features
- Applied Framer Motion animations and visual hierarchy to improve discoverability, engagement, and cross-device usability

Tech: React, Tailwind CSS, Firebase, Express.js, MongoDB, Node.js, TanStack Query, Recharts, Stripe

EDUCATION

Bachelor of Computer Science

Aug 2020 – Oct 2025

University of Rajshahi, Rajshahi, Bangladesh
