SUMMARY	
Frontend-focused React Developer with hands-on experience building scalable, production-ready web applications. Strong expertise in React-based UI development, state management, responsive design, and API integration. Experienced in collaborating across the stack to deliver secure, high-performance, user-centric interfaces.	
TECHNICAL SKILLS	
Frontend: HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), Typescript, React, Next.js UI/UX: Responsive Design, Component Reusability, Clean UI Architecture State & Data Management: TanStack Query (React Query), Axios Authentication & Security: Firebase Auth, JWT, Role-Based Access Control Backend (Integration): Node.js, Express.js, REST API Database (Familiarity): MongoDB, Firebase Payments & Integrations: Stripe Payment Integration Tools: Git, GitHub, Postman, Vite	
PROFESSIONAL EXPERIENCE	
MERN Stack Developer — Project Experience	June 2024– Present
- Developed React-based web applications with responsive, component-driven UI, integrating REST APIs built with Node.js and Express. - Implemented secure authentication flows using Firebase Authentication and JWT. - Built role-based dashboards with dynamic UI rendering for Admins, Managers, and Users. - Integrated Stripe payments for subscriptions and event registrations. - Improved dashboard performance by reducing unnecessary re-renders and optimizing state handling. - Created responsive, mobile-first user interfaces using Tailwind CSS and DaisyUI. - Managed server state and real-time data fetching using TanStack Query for better caching and UI consistency.	
PROJECTS	
AssetVerse (HR & Asset Management System)	Live Link Source Code
- Built role-based HR & employee dashboards with protected routes and JWT authentication - Implemented asset CRUD, employee asset requests, approvals, and tracking - Developed analytics dashboards for asset and request insights - Integrated Stripe subscription payments with package-based access control Tech: React, Node.js, Express, MongoDB, Firebase Auth, JWT, Stripe, Tailwind, Recharts	
Local Food Lovers Network (Community Food Platform)	Live Link Source Code
- Developed a platform for sharing food posts and reviews - Implemented user authentication and dynamic post interactions - Designed responsive UI for community engagement Tech: React, Node.js, MongoDB, Firebase Auth, Tailwind CSS	
Cleanliness & Issue Reporting Portal (Issue Reporting System)	Live Link Source Code
- Built a public issue reporting system with status tracking - Developed admin dashboard for issue moderation and management - Implemented authentication and responsive reporting interface Tech: React, Node.js, MongoDB, Firebase Auth, Tailwind CSS	
EDUCATION	
Bachelor of Computer Science	
University of Rajshahi, Rajshahi	
Oct 2022- Present
