SUMMARY

Frontend-focused Engineer with hands-on experience building scalable, production-ready web applications. Strong expertise in modern React ecosystems, component-driven architecture, responsive UI design, and secure authentication systems. Proven ability to develop full-stack features, optimize performance, and deliver user-centric interfaces aligned with real-world business workflows.

- TECHNICAL SKILLS
- Frontend:** React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
 - UI/UX:** Responsive Design, Component Reusability, Clean UI Architecture
 - State & Data Management:** TanStack Query (React Query), Axios
 - Authentication & Security:** Firebase Auth, JWT, Role-Based Access Control
 - Backend (Integration):** Node.js, Express.js, REST API
 - Database:** MongoDB, Firebase
 - Payments & Integrations:** Stripe Payment Integration
 - Tools:** Git, GitHub, Postman, Vite

- PROFESSIONAL EXPERIENCE
- MERN Stack Developer — Project Experience

Jan 2025 – Present

 - Developed **6+ React-based web applications** with modular, component-driven architecture
 - Integrated **RESTful APIs using Node.js and Express** for dynamic data-driven interfaces
 - Implemented **secure authentication systems** using Firebase Authentication and JWT
 - Created **role-based dashboards** with conditional rendering and protected routes
 - Integrated **Stripe payment systems** for subscriptions and transactions
 - Improved **UI performance by optimizing state management** and reducing redundant renders
 - Designed **responsive, mobile-first interfaces** using Tailwind CSS and DaisyUI
 - Managed **server state efficiently** using TanStack Query for caching and synchronization

- PROJECTS
- AssetVerse (HR & Asset Management System)

[Live Link](#) | [Source Code](#)

 - Built **role-based dashboards supporting 3+ user roles with protected routing** and conditional UI rendering
 - Spearheaded **asset lifecycle management, creating role-based dashboards for 3+ user roles** that automated asset requests, resulting in improved **asset tracking accuracy to 97%** across the company.
 - Processed **analytics dashboards for asset utilization** and request insights using Recharts
 - Integrated **Stripe subscription system supporting multiple pricing tiers** and handling payment workflows
 - Established **scalable UI architecture with reusable components** and responsive layouts

Tech: React, Node.js, Express, MongoDB, Firebase Auth, JWT, Stripe, Tailwind, Recharts

- Zyplo (Resource & Workspace Platform)

[Live Link](#) | [Private Repository](#)

 - Directed a **full-stack platform featuring a public resource hub** and a dynamic dashboard system
 - Combined **workspace creation, management, and deletion** with route-based architecture
 - Prepared **user profile management system with editable user data** and persistent state handling
 - Revised and initiated a **calendar module for task scheduling and timeline visualization**
 - Organised **overview dashboard with interactive charts** visualizing 3+ key metrics
 - Automated **real-time notification system handling task updates and events** with near-instant UI feedback
 - Reduced **unnecessary component re-renders, improving dashboard load performance** by ~25–35%
 - Built **responsive, scalable UI using modern component-driven design** principles

Tech: React, Next.js, Node.js, Express, MongoDB, JWT, Tailwind CSS

EDUCATION

Bachelor of Computer Science

University of Rajshahi, Rajshahi

- ADDITIONAL STRENGTHS
- Strong understanding of scalable frontend architecture
 - Experience working with real-world dashboard and SaaS-style applications
 - Ability to translate business requirements into functional UI systems
 - Familiar with modern development workflows and performance optimization techniques
